

Phase 2

- 3 general sizes, 25, 30 and 40cm blades
- Blades (4) round-ended with the exception of some luxury models that still had pizza-shaped blades
- Cage design changes, brass wire attached to inner ring by braze-welding and no longer curled round inner ring (with the exception of some luxury models such as Eolio and Simio)
- Motor head is either 'ball head' (aka axle-shaft head) or 'pancake head'
- Ball head style **always** accommodates the brushed motor
- Basic models carried brass cages/blades, luxury were nickel plated
- 25cm model has oilers over shaft and with a lever switch
- Larger models have Bakelite "hammer head" 3-speed rotary switch
- All have tab feet
- Oscillators in 2 sizes, the switch to engage the oscillator is placed under the gearing box to which the trunnion is attached, as described in a 1919 patent
- Most models were pin-striped in gold on head and base
- Most had transfer labels indicating MARELLI on motor head
- Serial numbers in gold numbers exposed on base, apparently, the 1st two digits indicating the year

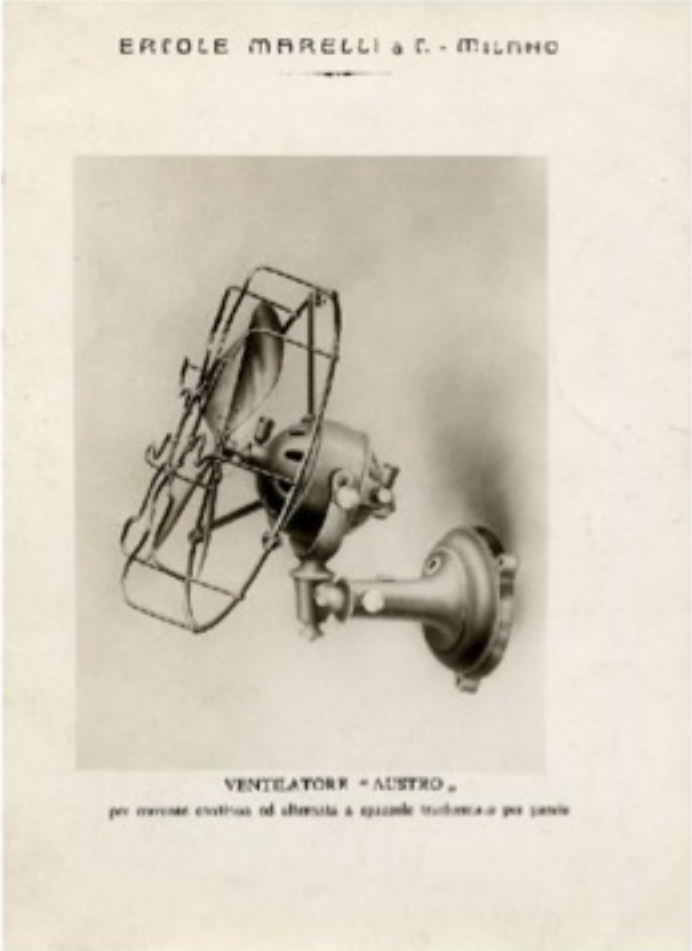

Key indicators: Tab feet, 9-spoke cage

Diameter of blades* tip-to-tip

	25cm	30cm	35cm	40cm	
Fixed	Sciroccale	Tropicale Eolio		Boreale Eolo	
Inclinable	Austro	Euro Simio		Noto Simiu	
Oscillating	??	Nordico		Occaso	

*round end blades for most. Pizza style blades for Eolio, Eolo, Simio and Simiu

Phase 2 1915-1928 *Inclinable head*

Austro (25cm blades)

Austro

Phase 2 Marellis Prepared by Simon M. Cutting 2010

Inclinable 33cm cage, 30cm blades

Euro-this model came with lever switch OR rotary
“hammer head” switch

Phase 2 Marellis Prepared by Simon M.
Cutting 2010

Phase 2 1915-1928 *Inclinable head (ball head or pancake)*

Euro- (30 cm blades) **Noto** (40 cm blades)

Phase 2 1915-1928 *Inclinable*

Simio (30 cm Pizza-shape blades) **Simiu** (40 cm Pizza-shape blades)

Phase 2 1915-1928 *Fixed Head (ball head or pancake)*

Tropicale (30 cm blades) **Boreale** (40 cm blades)

Eolio (30 cm) and **Eolo** (40 cm) were nickel plated with pizza shaped blades

The Tropicale model (ball head) came with rotary "hammer head" or lever switch

Phase 2 Marellis Prepared by Simon M. Cutting 2010

Phase 2 1915-1928 *Fixed Head (ball head)*

The Sciroccale, Tropicale and Boreale models with ball heads stayed in production until at least 1932

Oil cups
over shaft

Sciroccale (26cm blades)

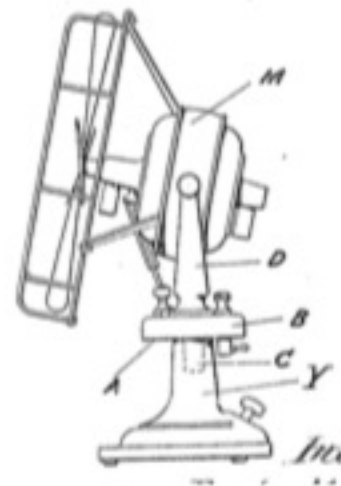

A 1924 Marelli Sciroccale

Phase 2 1919-1928 *Oscillators*

Switch to engage oscillator

Patent filed 1917
Granted 1919

Nordico (30cm blades)
Occaso (40cm blades)

A Marelli that rotates 360°. 30cm blades and tab feet.

Partners Fan- Early example.
